

UAT TEST CASES – SALES DASHBOARD (IT PRODUCT SALES DASHBOARD)

1. Objective

The objective of User Acceptance Testing (UAT) is to validate that the Sales Dashboard meets business requirements and is suitable for end users such as Sales Managers, Regional Leaders, and Business Heads before going live.

2. UAT Test Cases

2.1 Sales Metrics Validation

Test Case ID	Test Scenario	Test Steps	Expected Result	Status
UAT_TC_01	Validate total sales quantity	Select all products and view sales quantity KPI	System displays correct total units sold	Pass
UAT_TC_02	Validate total revenue calculation	Check revenue KPI for selected period	Revenue matches (Price × Quantity Sold)	Pass
UAT_TC_03	Validate profit calculation	Compare revenue and cost values	System shows correct profit value	Pass
UAT_TC_04	Validate return quantity	Apply returns filter	System displays correct returned units	Pass
UAT_TC_05	Validate return loss	Check loss due to returns	System calculates correct financial loss	Pass

2.2 Product Performance Validation

Test Case ID	Test Scenario	Test Steps	Expected Result	Status
UAT_TC_06	Identify top-selling product	Sort by revenue/sales	System shows highest performing product	Pass
UAT_TC_07	Identify least-selling product	Sort by sales ascending	System shows lowest performing product	Pass
UAT_TC_08	Product comparison	Select multiple products	System compares performance correctly	Pass

2.3 Time-Based Analysis

Test Case ID	Test Scenario	Test Steps	Expected Result	Status
UAT_TC_09	Monthly sales view	Select monthly filter	System displays correct monthly data	Pass
UAT_TC_10	Quarterly comparison	Select quarter filter	System shows accurate comparison	Pass
UAT_TC_11	Yearly trend analysis	Select yearly filter	System displays correct trend	Pass

2.4 Customer & Region Analysis

Test Case ID	Test Scenario	Test Steps	Expected Result	Status
UAT_TC_12	Customer segmentation view	Select customer category	System shows correct segment data	Pass
UAT_TC_13	Region-wise sales	Select region filter	System displays correct regional sales	Pass

2.5 Filter & Usability Testing

Test Case ID	Test Scenario	Test Steps	Expected Result	Status
UAT_TC_14	Product filter	Apply product filter	Dashboard updates correctly	Pass
UAT_TC_15	Time filter	Apply date range	Data updates accurately	Pass
UAT_TC_16	Combined filters	Apply multiple filters	System shows correct filtered output	Pass

3. UAT Success Criteria

- All critical test cases pass successfully.
- No data mismatches in KPIs (sales, revenue, profit).
- Filters work correctly without errors.
- Business users confirm the dashboard meets requirements.
- No critical defects remain open before go-live.
